Letter of Recommendation

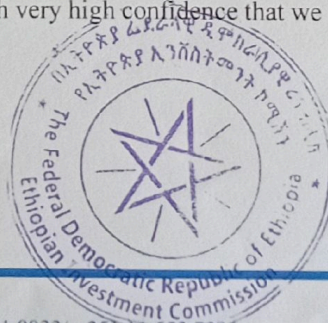

Ethiopia Investment Commission has recently undergone a huge Software Development projects to upscale and enhance information on investment opportunities using website, communication media, mobile application, and latest technology as part of the Transformation Triggering Facility (TTF) Project with a finance from the European Development Fund.

Among the others, the *Development of Smartphone mobile application to provide timely reliable information to investors* was one of the main tasks. IntraCom ICT Solution PLC is the company who have been contracted to carry out the Development of Smartphone application using technologies like Code Igniter PHP Framework, AngularJs, NodeJs, ASP.Net, C#, Java Script and Programming Technologies.

In this project the IntraCom ICT Solution PLC has carried out the *Web and Smartphone mobile application, which comprises:*

- *Designing the entire software architecture for the web and smartphone mobile application*
- *Preparation of System Analysis Document and User Interface Navigation Prototype*
- *Implementation of both the frontend and backend of the entire system*
- *Developing RESTful API for integration with existing three websites in different languages*
- *Developing standard API documentation for the application*
- *Working on multiple modules and portals in English, Amharic, and Chinese languages.*
- *Social Media and News live feeds adding from Investment Commission Website, Facebook, Twitter, and other renowned sites on the application*

This was an extraordinarily complex project, and one, which required detailed planning and execution. INTRACOM has demonstrated through their creativity, well organized approach, obviously experienced with complex tasks and challenges and systematic approach of Software Development that had impressed Ethiopia Investment Commission (EIC). It is with very high confidence that we recommend IntraCom ICT Solution PLC for a similar activity.

With Regards,

Ahmednur Yusuf
